

Favorite Things Survey

In this exercise, your application should ask the user a series of questions and store each answer in the http session.

After asking all questions, display a list of the user's answers.

Page 1

The user will see the first page on **FavoriteThings/Page1**

Favorite Things Exercise

What is your favorite color?

Confirm

The user will see the last page on **FavoriteThings/Summary**

Favorite Things Exercise

Favorite Color: Green

Favorite Food: Pizza

Favorite Season: Summer

Hints

- You'll need to create a FavoriteThings model that will hold the answers to all of the possible questions that the user will fill out.
- You'll need to use Session to store in progress status of the favorite things survey.
