

#Collections Part 2 Exercises

This exercise is made up of 10 coding problems. Each problem is independent of the others, and may be solved in any order.

Note, If you find yourself stuck on a problem for longer than fifteen minutes, move onto the next, and try again later.

C# source code has been provided for you in this repository. Please import the code into a new project in your local Visual Studio workspace.

If you have any questions, or concerns, please see one of the instructors.
